

Trash Bag Spider Webs

Materials Needed:

- black plastic trash bags
- scissors
- clear tape

Instructions:

Begin by laying a trash bag out flat. Trim off the sides and bottom so you're left with two big rectangles of plastic. Cut each piece into an approximate square (eyeballing it is fine). Fold one of the squares in half diagonally to form a triangle. Fold that triangle in half two more times. This is slippery stuff, so use a few pieces of tape to fasten the layers together on the loose side. It will help hold the shape together when you're cutting. If any of your tape pieces end up on the web itself after you've cut it out, remove them before unfolding.
